

How to register for the

CodeRED™ Mobile Alert App

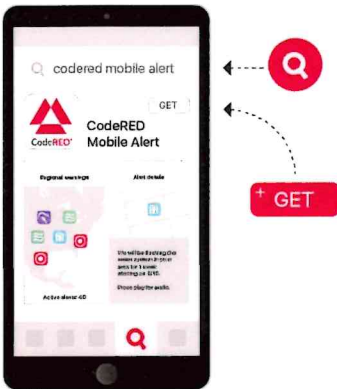

CodeRED is a notification service your public safety officials provide for you that alerts you to emergencies happening nearby, so you can stay informed and make decisions that will positively impact your well-being.

HERE'S HOW IT WORKS

Step 1

Download

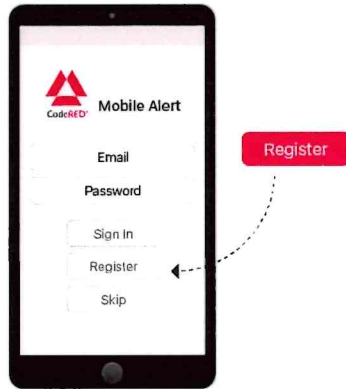

Download the free CodeRED Mobile Alert app by visiting the Google Play or App Store and searching for "CodeRED Mobile Alert app".

Step 2

Register

Open CodeRED and create a new registration. Keep in mind this will be a different login from our desktop version.

CodeRED™

Keeping you and your family safe is important. And knowing what is going on in the world around you is critical to maintaining that safety. Whether a tornado has formed near your home or a boil-water notice is issued for your area, it could be lifesaving to know that you need to take action.

Step 3

Settings

Once your account is created, open your settings. Here you can decide what type of alerts you'd like to receive, the alert sound, your personal warning radius and more. This app will follow you wherever you go and will send you notifications about alerts around you.

Step 4

Weather

Also in your settings, you have the ability to subscribe to CodeRED weather warnings. These alerts will keep you informed about sudden severe weather and could mean the difference between life and death.

Step 5

Get help

Want a quick walk-through? In settings at the very bottom, there is a link to a tutorial on the mobile app (or under "help" if you're on Android), and we highly recommend taking a look! There is also a helpful list of FAQs for any questions you may have.

Helpful Tips

- 1 From the home map screen, zoom out to view all active alerts in the United States. This allows you to check on relatives or other properties and see what is happening
- 2 We are optimized not to drain your smartphone's battery! In order for you to be protected, our location services do need to run in the background.
- 3 Use this app while you travel! If the city you're visiting is a CodeRED customer, you'll be able to receive emergency notifications wherever you're located.

Visit onsolve.com/crmobile today to download your community's free CodeRED public safety app! Or scan here, and encourage your neighbors to register.

OnSolve, provider of the CodeRED system, is the market leader in real-time, mass-notification and collaboration solutions used by the world's largest organizations.
